1. The preliminary amendment has not been entered since it is unsigned.

2. Claims 4-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can not depend upon another multiple dependent claim either directly or indirectly and may refer to only one set of claims. See MPEP § 608.01(n). Accordingly, the claims 9-13 have not been further treated on the merits.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear whether "which cross-sectional profile" in lines 9-10 refers to the cross-section of the filament as a whole, or to the cross section of the flat projection part. Therefore, the claimed structure is indefinite.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Pamm et al, U.S. Patent No. 2,816,349. Pamm et al discloses a fiber having a triangular end with a flat projection extending from one of the angles of the triangle wherein the fiber meets the limitations set forth in claims 1-2. See figure IV. The fiber may be polyester. See col. 6, line 1.
